EDUCATION

National Institute of Technology, Hamirpur

Bachelor of Technology in ECE, CGPA: 8.8/10

Nov 2022 - May, 2026

Hamirpur, Himachal Pradesh

TECHNICAL SKILLS

- **Languages/Frameworks:** C++, Python, JS/TypeScript, SQL, React.js, FastAPI, Node.js, LangGraph
- **AI:** RAG, LLMs, Embeddings, Vector Search, MCP, Scikit-learn, NumPy, Pandas
- **Databases:** PostgreSQL, PGvector, MongoDB, MySQL, Dataverse
- **Tools / Infrastructure:** Git, GitHub, Docker, Redis, Celery, Playwright, Postman, Alembic
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design

EXPERIENCE

BlackRock [🔗](#) | Software Engineer (BTO-DSC)

July, 2026 – Present

- Contributed to building C# plugins and Power Automate flows processing **1.6M+ production records** with **concurrency controls**, **SPN optimization**, and **throttling**.
- Developing **React/JavaScript UI** components and form logic on enterprise CRM, enhancing large-scale operational workflows.
- Building an internal **E2E test automation** using **Playwright** to replace third-party tooling, enabling **cross-browser & parallel test execution**.

PROJECTS

PACTUM - Contract Lifecycle Intelligence [🔗](#) [Github](#)

July, 2026

- Build a **hybrid RAG pipeline** with query routing across **PGvector semantic search + PostgreSQL filtering**, generating LLM responses with source citations.
- Implemented a **4-stage LangGraph pipeline** for clause extraction, policy comparison, risk scoring, exposing **3-Contract Based tools** via MCP for external clients.
- Automated renewal & obligation tracking using **Celery + Redis**, scheduling **background jobs** and triggering deadline-based **in-app & email notifications**.
- Developed **4 independent backend processes** across FastAPI, MCP, Celery workers & Celery Beat, with **content-hash caching** to minimize redundant LLM calls.
- *Tools: FastAPI, LangGraph, PostgreSQL, SQLAlchemy, Alembic, Celery, Redis, React/TypeScript, Docker*

Dock-IDE Coding Platform [🔗](#) [Github](#)

June, 2025

- Developed a fully functional **Web-based IDE** with real-time code editing, project creation, deletion, and code download, supporting up to **7 programming languages**.
- Implemented secure **OTP-based email authentication**, with **15+ active users** creating and managing **55+ projects**.
- *Tools: Nodemailer, OTP-Generator, Monaco-Editor, File-Saver, Express.js, JWT, React.js, Postman*

PHOTO-LYTICS (SaaS Application) [🔗](#) [Github](#)

Sept, 2024

- Built an **AI-powered text-to-image platform** with **90% positive feedback**, integrating **Razorpay**(Test Mode) to enable **15+ trial subscriptions**.
- Generated over **70+ high-quality AI images** while maintaining a **97% success rate** for error-free image generation.
- *Tools: Razorpay, Express.js, React.js, Bcrypt, Clip-drop API, Postman, Render*

ACHIEVEMENTS

- Secured **1st place** in **Electrothon 5.0** (300+ teams) by building TuitionMaster, a scalable mentor-student matching platform to connect students with mentors beyond geographical barriers.
- Solved **900+ Data Structures and Algorithms** problems across **LeetCode** and **GeeksforGeeks**, strengthening problem-solving and algorithmic skills.
